

**.INFO**

All this info is already pre-populated for you in Zen, but applies to any D6 theme. Much of this information was taken from drupal.org <http://drupal.org/node/171205>

**naming your theme (required)**  
name = Site theme

**theme page description**  
description = Custom theme for this site.

**screenshot on admin/build/themes**  
screenshot = screenshot.png

**Drupal version (required)**  
core = 6.x

**sub-theme inheritance**  
base theme = zen

**stylesheets**

These lines allow you to add stylesheets of any media type ("all", "print", etc.) To remove stylesheets of a base theme or module from your sub-theme, specify the stylesheet's name in your sub-theme's .info, but don't include a file in your sub-theme directory with that name.  
stylesheets[all][] = stylesheetname.css  
stylesheets[print][] = print.css

**IE conditional stylesheets**

conditional-stylesheets[if IE][all][] = ie.css

**javascripts (jQuery)**  
scripts[] = scripts.js

**regions**

To add a new region, copy Zen's page.tpl.php to your sub-theme's directory, add a line to this file, and then add the new variable to your page.tpl.php template.

regions[left] = Left sidebar  
regions[right] = Right sidebar  
regions[content] = Content  
regions[header] = Header  
regions[footer] = Footer  
regions[navbar] = navigation bar  
regions[content\_top] = content top  
regions[content\_bottom] = content bottom  
regions[closure\_region] = closure  
For more details: <http://drupal.org/node/171224>

**features**

Various page elements output by the theme can be toggled on and off. The "features" control which of these check boxes display on the admin/build/themes config page. This is useful for suppressing check boxes for elements not used by your sub-theme. To suppress a check box, omit the entry for it below. See the Drupal 6 Theme Guide for more info: <http://drupal.org/node/171205#features>

```
features[] = logo
features[] = name
features[] = slogan
features[] = mission
features[] = node_user_picture
features[] = comment_user_picture
features[] = search
features[] = favicon
; features[] = primary_links
; features[] = secondary_links
```

We've disabled the last two features by only defining the features we want and commenting out the others.

**STYLE SHEETS**

<b>html-elements.css</b>	Zen's reset stylesheet; standardizes HTML elements across browsers
<b>layout.css</b>	Page layout method (DIV positioning)
<b>wireframes.css</b>	Zen's basic wireframing tool
<b>backgrounds.css</b>	Background images ("Faux Columns" works well with Zen's layout.css)
<b>pages.css</b>	Page styling (corresponds to elements in page.tpl.php)
<b>tabs.css</b>	Drupal's tabs
<b>messages.css</b>	Drupal's error/warning/status messages
<b>blocks.css</b>	Block styling
<b>block-editing.css</b>	Zen's block editing links
<b>navigation.css</b>	Primary/secondary links or any navigation blocks
<b>views-styles.css</b>	Views module styling
<b>nodes.css</b>	Node styling (corresponds to elements in node.tpl.php)
<b>comments.css</b>	Comment styling
<b>forms.css</b>	Form styling
<b>fields.css</b>	CCK module's fields styling

**theme-settings**

Set the default settings to be used in theme-settings.php  
settings[zen\_block\_editing] = 1  
settings[zen\_breadcrumb] = yes  
settings[zen\_breadcrumb\_separator] = ' ' ;  
settings[zen\_breadcrumb\_home] = 1  
settings[zen\_breadcrumb\_trailing] = 1  
settings[zen\_breadcrumb\_title] = 0  
settings[zen\_rebuild\_registry] = 0  
settings[zen\_wireframes] = 0

**STYLE SHEET HINTS****blocks.css**

**.block**  
Block wrapper

**.block.region-odd**  
Zebra striping for each block in the region

**.block.region-even**  
Zebra striping for each block in the region

**.block.odd**  
Zebra striping independent of each region

**.block.even**  
Zebra striping independent of each region

**.region-count-1**  
Incremental count for each block in the region

**.count-1**  
Incremental count independent of each region

**.block-inner**  
Additional wrapper for block

**.block h2.title**  
Block title

**.block .content**  
Block's content wrapper

**#block-aggregator-category-1**  
Block for the latest news items in the first category

**#block-aggregator-feed-1**

Block for the latest news items in the first feed

**#block-block-1**

First administrator-defined block

**#block-blog-0**

"Recent blog posts" block

**#block-book-0**

"Book navigation" block for the current book's table of contents

**#block-comments-0**

"Recent comments" block

**#block-forum-0**

"Active forum topics" block

**#block-forum-1**

"New forum topics" block

**#block-menu-2**

"Primary links" block

**#block-node-0**

"Syndicate" block for primary RSS feed

**#block-poll-0**

"Most recent poll" block

**#block-profile-0**

"Author information" block for the profile of the page's author

**#block-search-0**

"Search form" block

**#block-statistics-0**

"Popular content" block

**#block-user-0**

"User login form" block

**#block-user-1**

"Navigation" block for Drupal navigation menu

**#block-user-2**

"Who's new" block for a list of the newest users

**#block-user-3**

"Who's online" block for a list of the online users

**comments.css****#comments**

Wrapper for the list of comments and its title

**#comments-title**

Heading for the list of comments

**.comment**

Wrapper for a single comment

**.comment-inner**

Additional wrapper for a single comment

**.comment-preview**

Preview of the comment before submitting new or updated comment

**.comment.new**

A new comment since the user last viewed the page.

**.comment.odd**

An odd-numbered comment in the list of comments

**.comment.even**

An even-numbered comment in the list of comments

**.comment.first**

The first comment in the list of comments

**.comment.last**

The last comment in the list of comments

**.comment.unpublished**

Unpublished comments

**.comment.unpublished div.unpublished**

The word "Unpublished" displayed beneath the content. See also the div.unpublished declaration in the nodes.css.

**.comment.published**

Published comments

**.comment-by-anon**

A comment created by an anonymous user

**.comment-by-author**

A comment created by the node's author

**.comment-mine**

A comment created by the current user

**.comment h3.title**

Comment title

**.new**

"New" marker for comments that are new for the current user

**.comment .picture**

The picture of the comment author

**.comment .submitted**

The "posted by" information

**.comment .content**

Comment's content wrapper

**.comment .user-signature**

The user's signature

**.comment div.links**

Wrapper for comment links. See also the ul.links declaration in the nodes.css.

**.indented**

Nested comments are indented

**.preview .comment**

Preview of the comment before submitting new or updated comment

**fields.css****.field**

Any CCK field.

**.field-type-datetime**

Always use "datetime" when creating new CCK date fields. "date" and "timestamp" are legacy types.

**.field-type-filefield****.field-type-image****.field-type-nodereference****.field-type-number-decimal****.field-type-number-float****.field-type-number-integer****.field-type-text****.field-type-userreference**

Field type wrapper for CCK, imagefield, and filefield

**.field-field-FIELDNAME**

Wrapper for named fields. Underscores in field name are replaced with dashes.

**forms.css****.form-item, .form-checkboxes, .form-radios**

Wrapper for a form element (or group of form elements) and its label

**.form-item input.error,****.form-item textarea.error,****.form-item select.error**

Highlight the form elements that caused a form submission error

**.form-item label**

The label for a form element

**.form-item label.option**

The label for a radio button or checkbox

**.form-required**

The part of the label that indicates a required field

**.form-item .description**

The descriptive help text (separate from the label)

**.form-checkboxes .form-item,****.form-radios .form-item**

Pack groups of checkboxes and radio buttons closer together

**.form-submit**

The submit button

**.container-inline div,****.container-inline label**

Inline labels and form divs

**.tips**

Tips for Drupal's input formats

**#search-box**

Wrapper in search-theme-form.tpl.php

**#edit-search-theme-form-1-wrapper label**

Label that says "Search this site:"

**#user-login-form**

Drupal's default login form block

2211 North Elston Avenue Suite #202  
Chicago, Illinois 60614  
P 773.645.4100 F 773.645.4105

**forms.css con't.****OpenID**

The default styling for the OpenID login link seems to assume Garland's styling of list items.

**#user-login-form ul**

OpenID creates a new ul above the login form's links.

**#user-login-form li.openid-link,****#user-login li.openid-link**

The "Log in using OpenID" links.

**#user-login-form li.user-link,****#user-login li.user-link**

The "Cancel OpenID login" links.

**#user-login li.openid-link,****#user-login li.user-link**

The OpenID links on the /user form.

**ie.css, ie5.css, ie6.css**

TIP: Internet Explorer limits Drupal to 31 stylesheets total:  
http://drupal.org/node/256802

**messages.css****div.messages,**

Important messages (status, warning, and error) for the user

**div.status**

Normal priority messages

**div.warning**

Medium priority messages

**div.error**

High priority messages. See also the .error declaration in pages.css.

**navigation.css****li a.active**

The active item in a Drupal menu

**#navbar, #navbar-inner**

Navigation bar

**#primary, #secondary**

Primary and Secondary links

**.block-menu**

Menu blocks

**.block-menu\_block**

"Menu block" blocks.

See http://drupal.org/project/menu\_block

**nodes.css****.node**

Node wrapper

**.node-inner**

Additional wrapper for node

**.sticky**

A sticky node (displayed before others in a list)

**.node-unpublished**

Unpublished nodes

**.node-unpublished div.unpublished,****.comment-unpublished div.unpublished**

The word "Unpublished" displayed underneath the content.

**.node-mine**

A node created by the current user

**.node-teaser**

A node displayed as teaser

All nodes are given a node-type-FOO class that describes the type of content that it is. If you create a new content type called "my-custom-type", it will receive a "node-type-my-custom-type" class.

**.node-type-page**

Page content node

**.node-type-story**

Story content node

**.node h2.title**

Node title

**.marker**

"New" or "Updated" marker for content that is new or updated for the current user

**.node\_picture**

The picture of the node author

**.node\_meta**

Wrapper for submitted and terms data

**.node\_submitted**

The "posted by" information

**.node\_terms**

Node terms (taxonomy)

**.node\_content**

Node's content wrapper

**.node div.links**

Wrapper for node links

**ul.links**

Taxonomy links, node links, comment links

**.preview .node**

Preview of the content before submitting new or updated content

**pages.css****#logo-title**

Wrapper for logo, website name, and slogan

**#logo**

Wrapper for logo

**#logo-image**

The actual logo image

**h1#site-name, div#site-name**

The name of the website

**#site-slogan**

The slogan (or tagline) of a website

**#header-blocks**

Wrapper for any blocks placed in the header region

**#mission**

The mission statement of the site (displayed on homepage)

**#content-top**

Wrapper for any blocks placed in the "content top" region

**#content-header**

Wrapper for breadcrumb, title, messages, tabs, and help

**.breadcrumb**

The path to the current page in the form of a list of links

**h1.title**

The title of the page

**h2.title**

Block title or the title of a piece of content when it is given in a list of content

**h3.title**

Comment title

**tr.even, tr.odd**

Some tables have rows marked even or odd.

**div.messages**

Important messages (status, warning, and error) for the user

**div.status**

Normal priority messages

**div.warning, tr.warning**

Medium priority messages

**div.error, tr.error**

High priority messages.

**.error**

Errors that are separate from div.messages status messages.

**.warning**

Warnings that are separate from div.messages status messages.

**div.tabs**

Tabs for View, Edit, etc.

**.help**

Help text on a page

**.more-help-link**

Link to more help

**#content-area**

Wrapper for the actual page content

**.pager**

A list of page numbers when more than 1 page of content is available

**.pager a, .pager strong, .pager-current**

Each page number in the pager list

**.feed-icons**

The links to the RSS or Atom feeds for the current list of content

**.more-link**

Aggregator, blog, and forum more link

**#content-bottom**

Wrapper for any blocks placed in the "content bottom" region

**#footer-message**

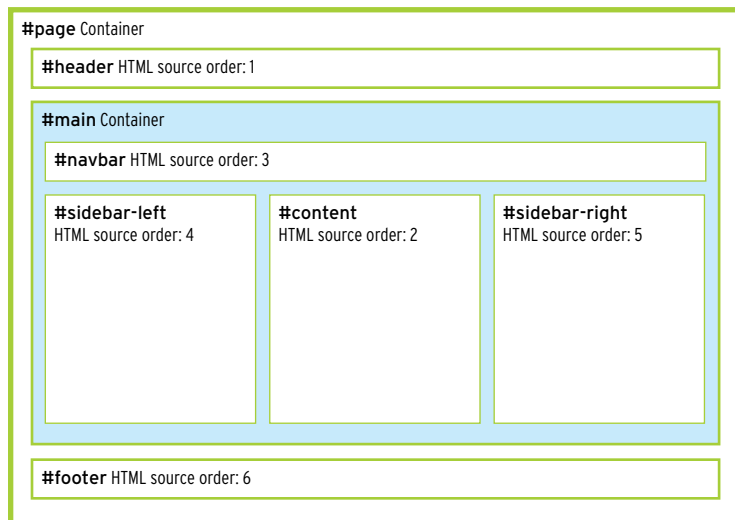

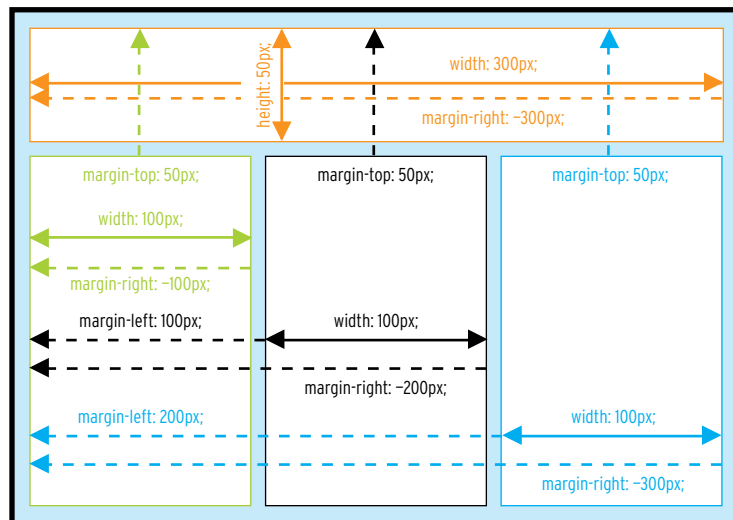

Wrapper for the footer message from Drupal's "Site information" and for any blocks placed in the footer region

**#closure-blocks**

Wrapper for any blocks placed in the closure region

**.box, .box-inner**

Wrapper for Comment form, Comment viewing options, Menu admin, and Search results.
